AETHERIC ENGINEERING

Formed in 1989, Aetheric Engineering Ltd is an independent telecommunications consultancy, specialising in satellite communications and satellite technology. We are renowned for our flexibility and tailoring of support to the actual needs of each of our clients.

We offer advice and support throughout all project phases from feasibility and design studies, through procurement and project management, to installation, commissioning and operation of telecommunications networks, especially satellite communication systems. We also offer support in the establishment of effective Communications Regulatory Organisations.

Aetheric Engineering's capabilities include spacecraft, earth stations, control centres, communications networks, and the interfacing of satellite communication systems with terrestrial infrastructure. We can offer geostationary, LEO and MEO satellite expertise and our earth station experience includes all sizes from VSAT to 30m diameter.

We are a specialist and independent consultancy, with our clients' interests at heart.

We have established a reputation for flexible and responsive support, and aim to ensure that each of clients receives relevant, consistent and complete assistance, meeting all of their requirements. We are happy to work as a part of our client's project team, when this is appropriate.

All our consultants have many years relevant experience and are accustomed to working at all levels of organisations. As a result, we offer impartial, effective and motivated support to all our clients.
